This review does not affect the borrowing terms, repayment terms or any other economic terms of the loan.

(*1) The following formula was used to calculate the interest-bearing debt ratio.

$(\text{interest bearing debt ratio}) = (\text{interest bearing debt}) \div (\text{interest bearing debt} + \text{unitholders' capital}) \times 100$

The unitholders' capital as of today (145,449,910 thousand yen) was used.

(*2) $(\text{long-term interest bearing debt ratio}) = (\text{long term debt} + \text{investment corporation bonds}) \div (\text{interest bearing debt}) \times 100$

(*3) All calculations of ratios were rounded to one decimal place.
